Over Winter 2018

Dear Friends,

Summer is just about over. Where did it go?  
Cool nights are forcing stinging insects into your home for shelter.

**BugBuster®** is now scheduling reduction applications to homes in our area. Yellow Jackets have been a large problem to some homeowners in our service area and many Queen Wasps and other insects will be attempting to over winter due to the cooler weather coming sooner than expected. Bug Buster will apply a general insect over winter barrier application that protects your home from insects seeking shelter under your warm siding. Prevention can help protect you from **Stink Bugs**, millipedes, centipedes, spiders, ants, wasp and yellow jackets.

Fall registration for this program is **\$106.75**. Over Winter Exterior Barrier Applications will begin September 18<sup>th</sup> weather permitting and should be concluded by October 31<sup>st</sup> 2018.

In the interim, if you have questions regarding our service, please contact our office at your convenience. Questions can be forwarded thru our web site [www.BugBusterinc.com](http://www.BugBusterinc.com) or [Jay@BugBusterinc.com](mailto:Jay@BugBusterinc.com) or call us at 330-650-2858.
